Sep 2015

Experience

- **Sr. UX/UI Designer - Quest Software**

Jan 2016 - Present, California

- **Designed** a project planning feature for a demand generation & content management system in-house **web application product** which saved around **15%** of project the manager's time on planning, improved visibility on SLAs, and reduced project delays.
 - **Redesigned and evaluated** Quest e-commerce website to align branding and improve the user experience when shopping online. the project had a positive impact on the checkout experience and content organization in general and **reduced** sales calls significantly.
 - **Evaluated** the process of customer contact support and **redesigned** the flow for customers to contact Quest and One identity support services. Worked closely with stakeholders and customers to identify issues and applied appropriate UX approaches at each stage to enhance the experience. The result is a **10% increase** in deflection.
 - **Designed** various **minimalist UI patterns** to help reduce overwhelming information and improve discoverability using the main principals of UX such as **Gestalt theory**. **Conducted competitive analysis** to come up with standard patterns and applied **quantitative testing** using **visual web optimizer** to assess design and **iterate frequently**. The result has been implemented on all product line, product, and solution pages of Quest and One Identity marketing websites.
 - **Built and maintained** a **scalable design library** based on **Atomic design** using Sketch & Frontify
 - Qualitative & quantitative **user testing** (A/B, Split, Goal conversion campaigns)
 - Create detailed **wireframes, mockups, user flows, task analysis, and interactive prototypes**
 - Conduct **user research** and **competitive analysis**
 - **Analyze** and **break down** complex user tasks into intuitive steps
 - **Collaborate** effectively with stakeholders, and project managers to bring concepts to life
 - Handoff designs and prototypes with **accurate specs** to developers
 - **Research** tools and **critique** products to evaluate purchase decision
 - Create **visual assets** & participate in rebranding company acquisitions
- **UI Developer - Dell Software**

Mar 2014 - Jan 2016, California

- Developed **responsive, cross-browser** web pages using the **Bootstrap** framework
 - Delivered a video gallery site using complex **Ajax technology**
 - Worked and customized 3rd party **plugins**
 - Developed responsive widgets using the **Dell design library**
 - **Collaborated** with the **remote** team in China, India, and across the US
 - **Led** projects and **trained** team members
 - Worked efficiently in a fast-paced **agile** environment
 - **Awarded** as a hard-working employee in the last quarter of 2014
- **UX Designer | UI Developer - QuickStart Intelligence**

May 2013 - Mar 2014, California

- **Redesigned** company website to be responsive
 - Conducted **qualitative usability tests** which increased conversion rate by **0.2%**
 - **Hand-coded** interactive responsive components which increased mobile traffic by **50%**
 - Created visual assets
- **UI Developer - Byte Information Technology**

May 2010 - Nov 2011, Melbourne (Australia)

- **Developed** several pixel-perfect websites from PSD files for a wide range of clients
 - Created interactive **prototypes**
 - Worked with different **content management systems** and programming languages
