Experience

Sr. UX/UI Designer - Quest Software

Jan 2016 - Present | CA

- Built and maintained a scalable UI pattern design library based on Atomic design and WCAG accessibility guidelines and created several responsive interfaces for high traffic domains including marketing, e-commerce, support, and community areas.
- Designed project planning and reporting features for an internal product which saved around 15% of the project manager's time on planning, improved visibility on SLAs, and reduced project delays.
- Researched and redesigned Quest e-commerce website including product listing, checkout flow, and payment to align branding and enhance the user experience which reduced sales calls significantly.
- Redefined the flow of customer contact support which increased deflection by 10% shortly after launch.
- Quantitative testing through A/B, split, and conversion tracking campaigns using Visual Web Optimizer to validate the design with users.
- Improved design processes by introducing new tools to facilitate hand-off procedures which increased work efficiency significantly for designers and developers.

UI Developer - Dell Software

Mar 2014 - Jan 2016 | CA

- Delivered a video gallery site using complex Ajax technology.
- Developed responsive, cross-browser web pages using the Bootstrap framework, and several 3rd-party plugins.

UX Designer | UI Developer - QuickStart Intelligence

May 2013 - Mar 2014 | CA

- Redesigned company website to be responsive.
- Hand-coded interactive responsive components which increased mobile traffic by 50%.
